Increased efficiency with the Emergency Mobile Box from MPJ ®

An innovative approach to emergency management that increases efficiency in emergency management by making resources available, optimizing communication and speeding up the response to emergencies.

“Every accident at work, various sources of danger or escalations should be avoided!”

“Central emergency management”

The approach

This innovative solution aims to increase efficiency in emergency management by making resources available and speeding up the response to emergencies.

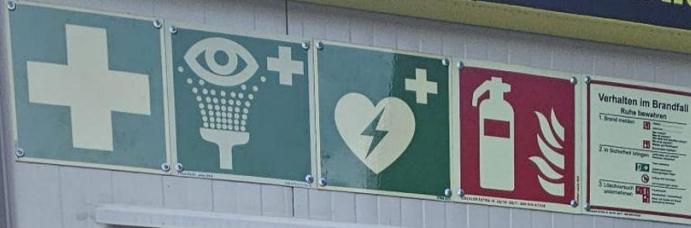

The advantages

The Emergency Mobile Box simplifies communication and access to important information in order to manage emergencies efficiently.

Further information

Function of the Emergency Mobile Box

Modern technology

The EMB is equipped with modern technologies that enable fast data transmission and communication, even as a stand-alone version.

Fast response

GPS, communication devices, medical equipment and drone technologies as well as camera systems are immediately ready for use.

Improved communication

The EMB enables effective communication between emergency services in order to coordinate the response to emergencies.

Advantages of an Emergency Mobile Box

Faster response times

The Emergency Mobile Box enables a faster response time to emergencies.

Optimized use of resources

The Emergency Mobile Box supports the efficient use of resources in an emergency.

Improved safety

The Emergency Mobile Box helps to improve the safety of affected persons.

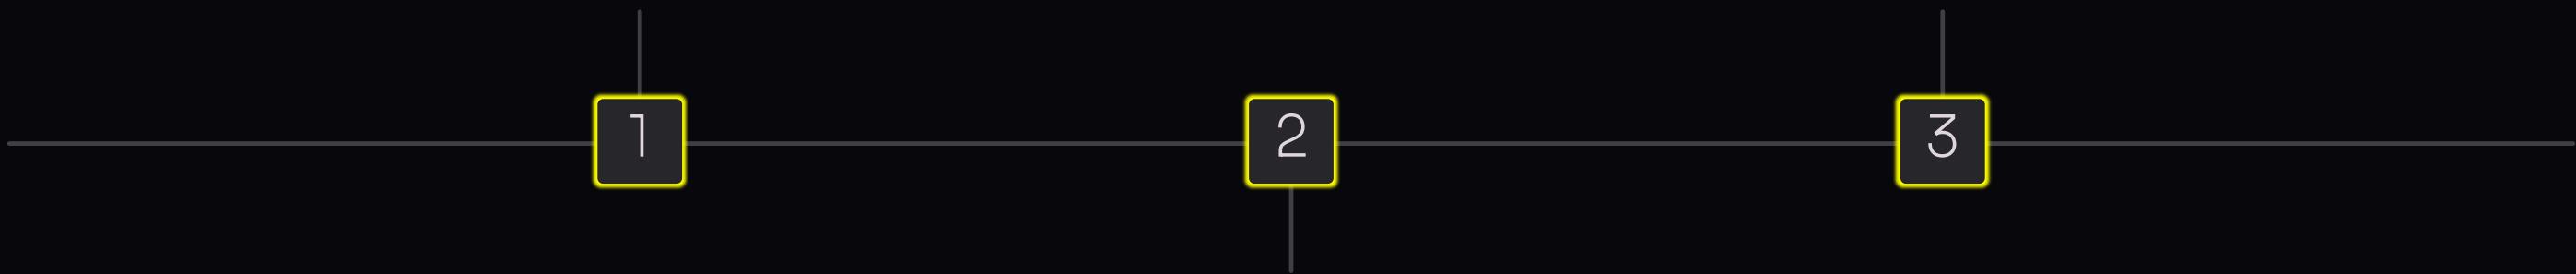

Implementation of the Emergency Mobile Box

Training courses

Implementation requires training to familiarize everyone involved with the EMB.

Effective use

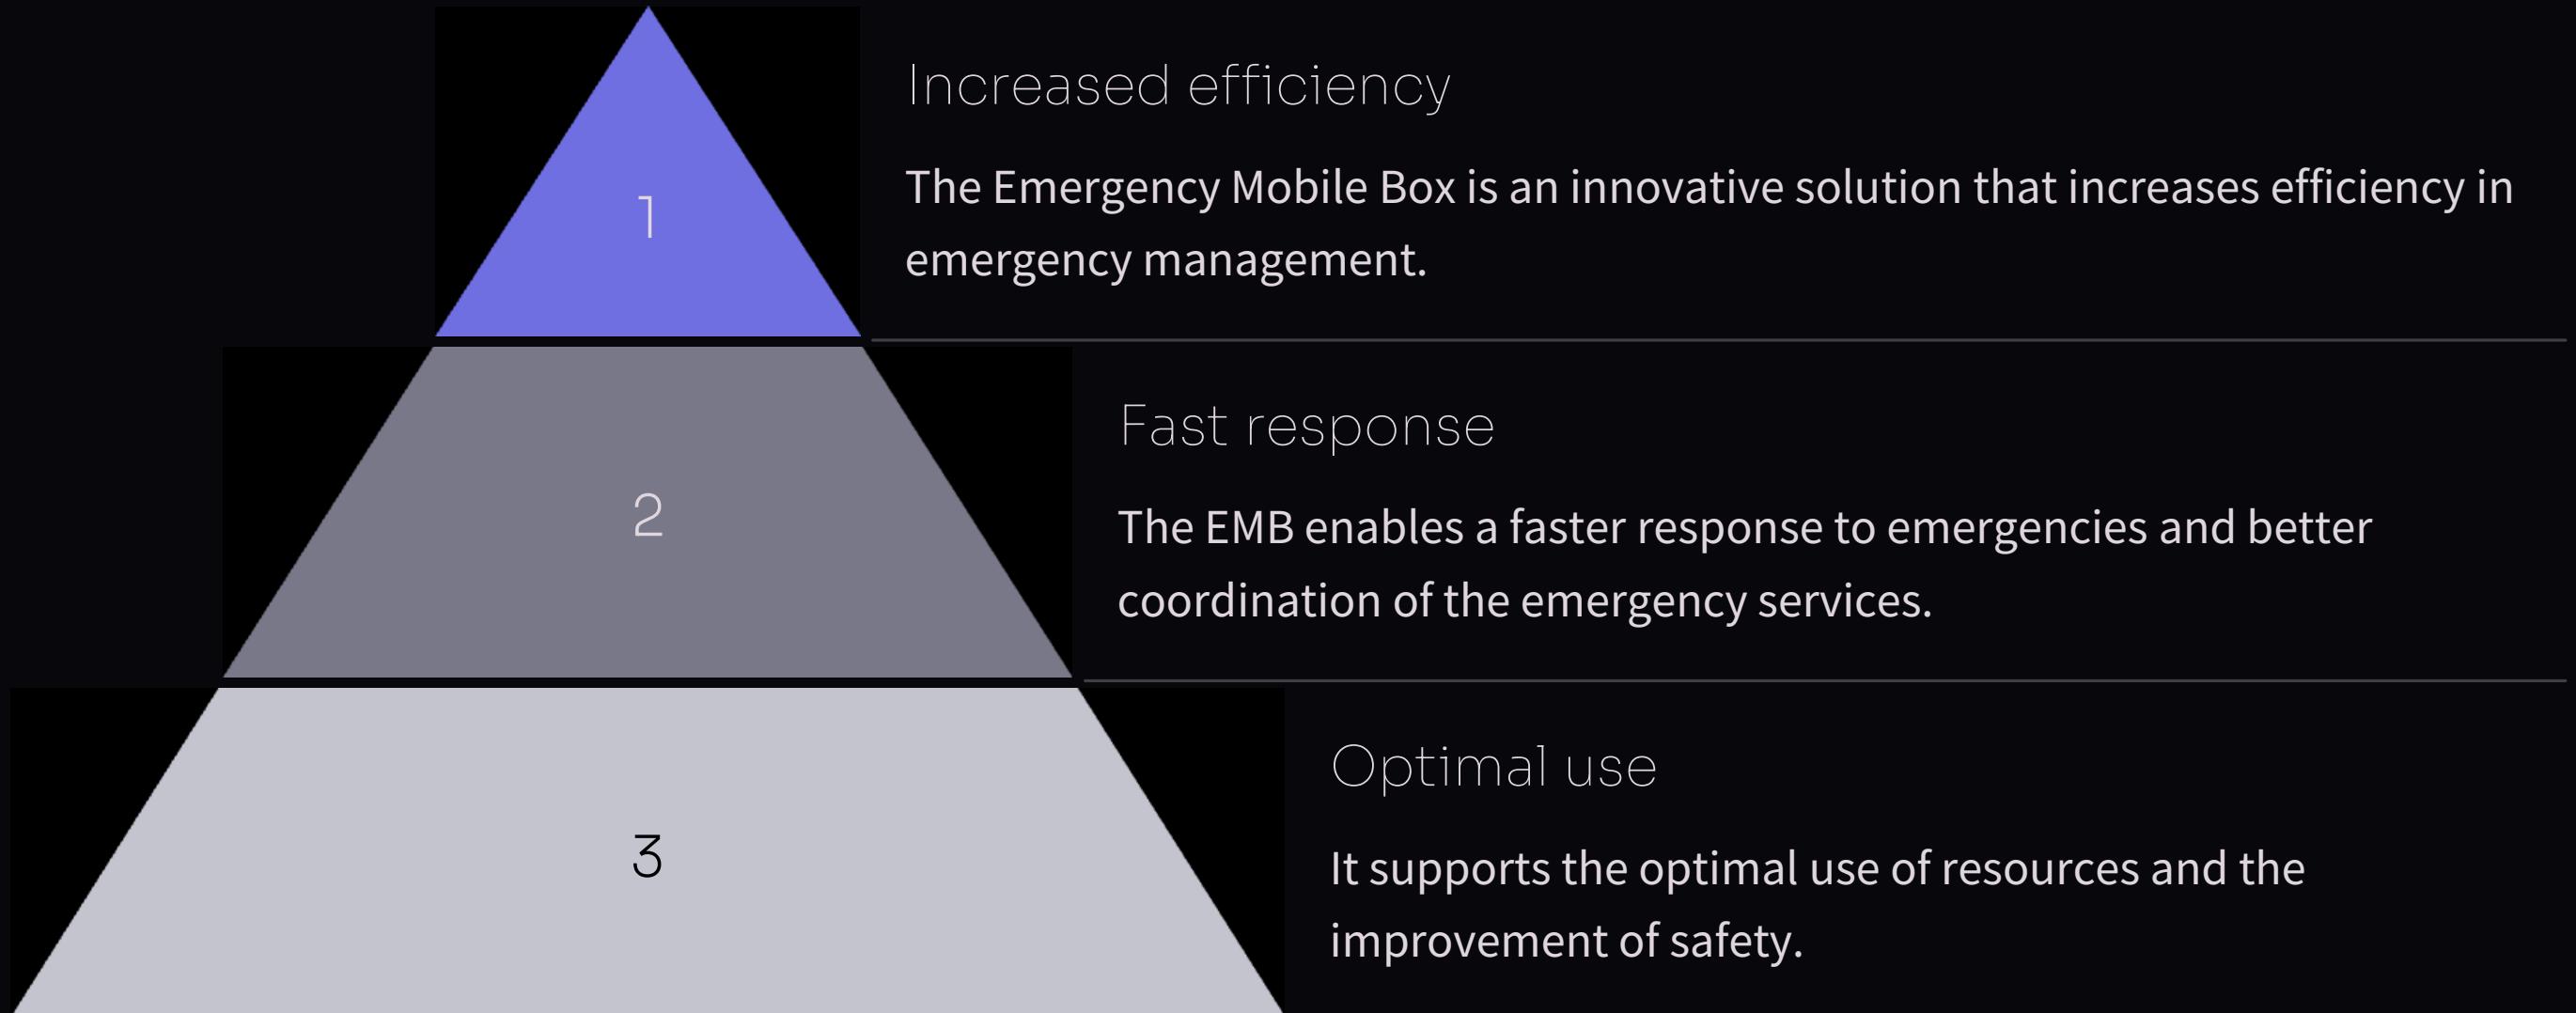

Only a deep understanding of the EMB can ensure its maximum efficiency. E.g. evacuation drill,.

Adaptation of existing plans

Existing emergency plans such as safety concepts, evacuation and fire protection plans must be adapted to the functions of the Emergency Mobile Box.

Conclusion: The Emergency Mobile Box from MPJ ®

Advantages for different areas of application

1

Rescue services

The Emergency Mobile Box enables a faster and more efficient response to emergencies.

2

Civil protection

The EMB supports the coordination of relief measures in the event of major damage such as natural disasters or events.

3

Industry / Construction sites

The Emergency Mobile Box helps to deal with accidents and other emergencies in industrial environments or on construction sites.

Numerous other application examples are possible!

Summary: The Emergency Mobile Box

1

Innovation

The Emergency Mobile Box is an innovative solution for emergency management in over 20 MGOOS models.

2

Efficiency

It increases efficiency by making resources available and shortening response times.

3

Safety

The Emergency Mobile Box makes a significant contribution to greater safety in emergency situations.
